

Technical Document Peer Review

Reviewer: Danny Hong

Review: Dane Sobol

Technical Documentation: Light Buoy

Rubric	Feedback
Organization	Dane's paper is really organized and easy to follow. The images really helped me to visualize how things were put together to construct the light buoy.
Well Written	The paper was well written and easy to follow. The flow is consistent in terms of content in each section. There were a few grammatical errors, but the message in the in the design process is clearly understandable.
Supporting Stance	The paper is very consistent in constructing the light buoy. Each section all connects to how it relates to the construction of the light buoy and how all the design intertwine with each other.
Clear Diagrams	The diagrams were utilized in the paper as a form of reference points and were clear to follow. It made the paper more understandable.

Overall Grade: A

Comments:

Overall the paper is easy to read and follow. There were just a few grammatical errors, but the content is still understandable.
